

Core6 Environmental is currently looking for a full-time, permanent **Entry-Level Hydrogeologist** to join our team. We are an energetic and exciting consulting firm that provides a range of environmental services. We are known for the quality of our work, strong technical skills and regulatory knowledge.

The position is suited for individuals who are looking to work on a wide variety of physical and contaminant hydrogeological projects and are willing to learn and be mentored by our team. The successful candidate will work on physical and contaminant hydrogeology projects including the collection of data for dewatering design and implementation, water supply and surface water/groundwater interaction, contaminant characterization and transport assessments.

Qualifications

- Bachelor's degree in Geology, Geological Engineering, or Earth Sciences. Course work includes both physical and contaminant hydrogeology;
- Valid Class 5 drivers license with access to a vehicle;
- Must be able to travel and when necessary work overtime to meet project schedules;
- Strong, Clear and Concise Communication and Written Skills; and
- Confident and capable of working following tasks and understanding desired outcomes.

Desirable Assets

- Knowledge of field data collection for contaminant and physical hydrogeology including installation of monitoring wells, hydraulic conductivity testing, and aquifer testing;
- Comfort with the management and interpretation of data;
- Curiosity to learn and gain technical knowledge from your peers and mentors;
- Knowledge of geochemistry primarily associated with Acid Rock Drainage and metals leaching;

Salary Range

The expected base salary range for the qualifications listed above is \$55,000-70,000 per year. This salary range may be adjusted for additional qualifications, experience and desirable assets.
