

**Core6 Environmental** is currently looking for a full-time, permanent **Intermediate Hydrogeologist** to join our team. We are an energetic and exciting consulting firm that provides a range of environmental services. We are known for the quality of our work, strong technical skills and regulatory knowledge.

The position is suited for individuals who are looking to work on a wide variety of physical and contaminant hydrogeological projects and are willing to learn and be mentored by our team of senior hydrogeologists. The successful candidate will work on physical hydrogeology projects including dewatering design and implementation, aquifer testing, water supply and surface water/groundwater interaction. The candidate will also undertake a wide variety of projects requiring contaminant characterization and transport assessments to support site investigations, risk assessment and remediation.

#### **Qualifications**

- Master's degree in Hydrogeology
- Eligibility for registration with Engineers and Geoscientists BC;
- Valid Class 5 drivers license with access to a vehicle;
- Must be able to travel and when necessary work overtime to meet project schedules;
- Strong, Clear and Concise Communication and Written Skills; and
- Confident and capable of working following tasks and understanding desired outcomes.

#### **Desirable Assets**

- Five years + of practical relatable hydrogeology experience in a consulting environment
- Practical knowledge of data collection for contaminant and physical hydrogeology including installation of monitoring wells, hydraulic conductivity testing, and aquifer testing;
- Knowledge and experience with analyzing the effects of climate change on groundwater resources;
- Physical groundwater flow and contaminant fate and transport modelling combined with knowledge of modeling software such as MODFLOW;
- Curiosity to learn and gain technical knowledge from your peers and mentors and confident with sharing information and expertise;
- Knowledge and familiarity with geochemistry primarily associated with Acid Rock Drainage and metals leaching;
- Familiarity with the BC Environmental Management Act, BC Contaminated Sites Regulation and/or Federal Guidelines.

#### **Salary Range**

The expected base salary range for the qualifications listed above is \$80,000-100,000 per year. This salary range may be adjusted for additional qualifications, experience and desirable assets.
